Temperature Sensor [TMP3... ?]
Name 2

```
1 int sensorPin = A0;
2 int led = 13;
3 float temp;
4
5 void setup() {
6   pinMode(led, OUTPUT);
7   Serial.begin(9600);
8 }
9
10 void loop() {
11   int value = analogRead(sensorPin);
12   temp = (value * 5.0 / 1024.0) * 100;
13
14   Serial.println(temp);
15
16   // ADD HERE
17   if (temp > 32) {
18     digitalWrite(led, HIGH);
19   }
20
21   if (temp < 28) {
22     digitalWrite(led, LOW);
23   }
24
25   delay(500);
26 }
```
